

TECHNICAL DATA SHEET

FEST Timer

Microcement additive that extends working time with the material.

DESCRIPTION

FEST Timer is an additive that extends the "open time" and workability of FESTFLOOR GO!, FESTFLOOR Life, FESTWALL Life, HYDROFEST and other two-component microcements. It is especially useful when working at high temperatures. The product noticeably delays the setting time of the microcement and allows tools to be cleaned easily after the work is completed.

PROPERTIES

- odorless
- does not affect the hardness of the microcement
- compatible with most two-component microcements available on the market

TECHNICAL DATA

- Colour: milky
- Shelf life: 6 months. The product should be stored at a temperature above 15°C, protected from frost.

DIRECTIONS FOR USE

Add the product to the microcement in a ratio of 1 to 3% of the microcement weight (dry mass + polymer). In the case of two-component microcement, it is best to add it to the polymer, mix it, and then mix it with the dry mass as usual.

PACKAGING

- 1 kg

CLEANING OF TOOLS

Clean equipment and tools immediately after use with water.

SAFETY AND HEALTH

- Causes eye irritation.
- If medical advice is needed, have the product container or label at hand.
- Keep out of reach of children.
- Keep container tightly closed.
- In case of feeling unwell, contact a doctor.
- Dispose of waste at special collection points.
